

ARIES INGENIERIA Y SISTEMAS, S.A.

Necesidad de cubrir 3 puestos:

- Sénior
- Recién terminado el Doctorado
- A falta de un año de terminar el doctorado

Se requiere buen expediente y alto nivel de inglés

Senior Electro-mechanical Engineer

We are looking for a Senior Electro-mechanical Engineer to design advanced electro-mechanical systems for the analysis, design and production of a wide array of leading edge, high precision and efficient systems for applications in precision motion and positioning control and structural dynamics in the Aerospace, Aviation, Automotive and Rail sectors, where high performance and precision matters.

Specific responsibilities:

Motion and position control, Develop advanced test systems, electro-mechanical devices such as reaction mass actuators, hexapods, Create 3D models and machine drawings using CAD Software, Assemble hardware, Support activities with hands-on aptitude/experience. Support hardware test efforts with design, assembly, and testing. Support product development, Support new business development initiatives.

Preferred Qualifications:

Doctors Degree in Engineering

Up to five (5) years design and engineering experience of Electromechanical systems, Control, Pneumatic and Hydraulics.

Knowledge of FEM, CAD, Matlab, Simulink and 3D modeling Software.

Experience with creating and reading machine drawings

Aries is a growing company that offers an outstanding work/learning environment with real growth opportunities.
