# SMARTER MOBILITY DATA CHALLENGE

BY MANIFESTE IA  
FOR A GREENER FUTURE

Membres du Manifeste IA

## Where Artificial Intelligence improves the world

**Save the date: Oct 3<sup>rd</sup> – Dec 3<sup>rd</sup>** | Leonardo da Vinci imagined mobility. It's up to your students to revolutionize it!

Nowadays, transport accounts for nearly a quarter of greenhouse gas emissions in Europe. The development of electric vehicles will contribute to reducing these emissions and support the transport sector in its energy transition.

With the #SmarterMobilityDataChallenge, 11 major French industrial Groups challenge the students to imagine the future of electric mobility.

The concept? Two months to imagine and test forecasting models alone or in teams statistics and machine learning to predict the availability of charging stations in an European capital: Paris.

**Let the audacity and imagination of your students reveal themselves.**

With this challenge, they will meet 11 of the largest French industrial groups and will have the opportunity to put theory into practice. A concrete, useful and exciting case that will put their knowledge to good use!

They will be in charge of the construction of a predictive model from a real database at the scale of a big city. They will be supported throughout the challenge by a network of qualified Data Scientists.

Prepare your students for the #SmarterMobilityDataChallenge! This challenge is open on a European scale to the best schools and training courses in Data Science.

We are waiting your numerous students and count on you to promote the event on your intranets, newsletters and bulletin boards.

You will find attached a note for your students, please forward to them ideally by September 26, 2022. Here is also [communication supports](#) to share this challenge on your different channels (save the date, motion design, posters...
